

SOLAR FEASIBILITY STUDY

Are you considering installing solar at your property or business? As a nonprofit energy consulting firm, we can provide you with an unbiased and independent analysis to help you evaluate the viability of pursuing a solar project. Through our feasibility studies, we'll work with you to evaluate the most important considerations, including the following:

Economic Feasibility

- Review the project site and verify the availability of infrastructure
- Study relevant correspondence and documentation

Market Feasibility

- Assess the regional market and, if applicable, your marketing plans for the project
- Evaluate the competition, including similar facilities in the market area

Technical Feasibility

- Review the proposed project design and calculations to ensure assumptions are reasonable for industry standards
- Study any necessary leases, agreements or permits
- Examine the costs to develop, build and operate the project
- Evaluate the plan for procuring equipment as well as for operations and maintenance

Financial Feasibility

- Review the project's financing model and cash flow
- Explore potential opportunities for rebates and other financial assistance from your local electric utility and government

Management Feasibility

- Assess your project management strategy and construction timeline
