

Renewables Owners Engineers

Is your facility planning to add on-site renewables? Our commissioning services ensure systems meet project specifications, comply with owner requirements and standards, and operate correctly to decrease maintenance and safety issues.

We provide a thorough review of system design, a detailed system inspection of all components and equipment, and a review of all aspects of the installation for compliance with safety codes and standards. We'll identify issues and solutions so that you can be confident that your project is built for long-term quality, reliability, safety and performance.

As a third-party commissioning agent, we'll provide unbiased recommendations to ensure you are getting the best outcomes for your site.

Contact us today to discuss your renewable energy goals and needs.

BENEFITS:

- Unbiased third-party expertise
- Confidence in project specifications, safety, reliability and performance
- Worry-free assurance that system will meet all necessary requirements and be built for long-term operation

SERVICES:

- RFP writing assistance
- Bid review
- Design review
- On-site inspections and commissioning
- Feasibility study

ABOUT ADVANCED ENERGY

Advanced Energy is a nonprofit energy consulting firm. We work with electric utilities, government and a wide variety of private organizations in the residential, commercial and industrial, renewables, motors and drives, and electric transportation markets. Our customized services include research, testing, training, consulting and program design.
